

**Work Assignment Title:** Re-grading Surface Soil on the property of Ms. (b)(6) privacy (Landowner name)  
**Work Assignment #:** 3-11 (PR) **WAM:** Dominic DiGiulio  
**Period of Performance:** March 12, 2012 - June 30, 2012  
**EPA Contract No.:** EP-C-08-034 **Contractor:** Shaw Environmental, Inc.

## **BACKGROUND**

The Ground Water and Ecosystems Restoration Division (GWERD) is part of the National Risk Management Research Laboratory (NRMRL) and the Office of Research and Development for the U.S. Environmental Protection Agency (EPA). The GWERD is NRMRL's center for risk management research in the subsurface environment and the interface of that environment with other environmental compartments such as surface water and the atmosphere. The GWERD operates a dedicated technical assistance and technology transfer program to provide technical support to EPA regional and program offices and State offices.

This Work Assignment provides support needed for re-grading the pasture of Ms. (b)(6) privacy (Landowner name) in Pavillion, Wyoming. The surface soil at the property of Ms. (b)(6) privacy (Landowner name) was damaged (depressions) during the installation of a monitoring well performed on WA 2-8 Field Support for Carbon/Geological Sequestration. Isolated depressions interfere with surface irrigation of production of alfalfa. Re-seed with dry land pasture.

The Contractor will receive specific Technical Directives (TDs) to perform property restoration.

## **REQUIRED WORK EFFORT/TASKS**

The Contractor shall provide property grading/restoration to meet the satisfaction of EPA.

## **MILESTONES**

The Contractor shall report on the completion of property restoration including photos of before and after restoration. The principal investigator in conjunction with EPA Region VIII will draft a form for the property owner to sign stating that the work was performed and performed to the satisfaction of the property owner.

The Contractor will submit copies of all TDs to the Contracting Officer.

The status (current and cumulative hours expended, costs, date completed, etc.) of each of these TDs shall be included in monthly progress reports.

All correspondence between the Contractor and Project Officer, Work Assignment Manager, including report letters, analytical data reports, spectral data, and monthly reports, shall be provided using double-sided copying.

The Contractor shall separately track OMIS tasks by the appropriations by which they are funded.
